Vera Musch is a senior policy advisor at the Dutch Ministry of Agriculture, working within the Knowledge and Innovation Department. She specializes in the domains of food and nutrition security and rural development within the framework of Dutch Policies on Food and Nutrition Security. She also engages in the agenda on global governance of food systems. Previously, she worked as a policy advisor and programme manager at Nuffic, the Dutch organization for internationalization in education, where she worked within international cooperation programs and gained extensive experience in working with partners across Africa, Southeast Asia, and the Middle East. She holds a Master's degree in Business Administration and International Relations.

Vera Musch (NL)

Niels Fold - My research addresses the relationship between economic-geographic globalization processes and local responses, primarily examined through the analytical lens of global value chains (GVCs). I have specialized in agro-industrial value chains that connect producers in the Global South and consumers in the Global North. I aim to understand rural development and agrarian transformation by combining structural (GVC) analysis with livelihood studies. This approach is applied to the study of settlement development and rural-urban relations in rural areas dominated by particular crops. Furthermore, my research encompasses broader patterns of regional development in the Global South such as the dynamics in rural hinterlands of rapidly growing metropolitan areas.

Anita Srdarev is employed at the Ministry of Agriculture, Forestry and Fisheries, Republic of Croatia, at the Service for Harmonization with EU Strategies and International Obligations, dealing with strategic planning, coordination of the Ministry's activities arising from the United Nations 2030 Agenda for Sustainable Development and the Paris Agreement on Climate Change, development of a national strategy for the bioeconomy, promotion activities, improvement of knowledge and raising awareness in the field of agriculture and bioeconomy.

Anita Srdarev (HR)

Filippos Bantis is an Assistant Professor of Vegetable and Greenhouse Crops at School of Agriculture, University of Western Macedonia, Florina, Greece. He holds a PhD in the field of Vegetable Crops and a PhD in the field of Plant Physiology. He participates/participated in over 13 European and national research projects as well as in 4 joint action projects (COST Actions). His main research interests are in the field of horticultural crop production with view to mitigating the adverse effects of climate crisis. His research is distributed in the physiology and overall quality of horticultural plants grown under controlled conditions in greenhouses and vertical farms, in hydroponic systems and open field.

José Luis Cruz has a PhD in Rural Development at the Polytechnic University of Madrid and a Social Sciences Degree at the Complutense University of Madrid. Since 2013, he has been a researcher and Head of the Rural Development Department at the Madrid Institute for Rural, Agriculture and Food Research and Development (IMDRA). His main topics are innovation in agricultural and food systems, innovation processes, participatory and multiactor processes, and consumers' and farmers' perceptions. He works as a researcher, advisor, consultant, evaluator, and teacher in European and developing countries. He has written several books and papers about international development and cooperation. He has worked with NGOs, the Spanish Agency International Development Cooperation, and Regional Development Cooperation Agencies.

José Luis Cruz (SP)

Susanne Johansson holds a PhD in agronomy from the Swedish university of agricultural sciences and is a senior research officer at the Swedish research council Formas. As such her main focus areas are working with international research and innovation collaborations on agricultural sciences. At present Susanne is a national expert for the EU Mission A soil deal for Europe, as well as Vice Chair of the Governing Board of the EU partnership AGROECOLOGY – Accelerating farming systems transition through agroecology Living Labs and Research Infrastructures. In addition to SCAR ARCH, she is also member of SCAR WG on agroecology and represents Sweden in SCAR Steering Group. Relevant to SCAR ARCH's areas, Susanne was a Senior research advisor at the Swedish development agency Sida during 2020-2022.
